

# IN YEAR 2

We have been so excited learning how to write explanation texts this term. We started by watching a video about the life cycle of a butterfly and then wrote about the different stages.

In Science, children observed and described how seeds and bulbs grew into mature plants. They provided the right conditions for them to grow healthily and even carried out a few experiments. In one of them, children predicted that bigger seeds would grow into taller plants. Then they observed how seeds of different sizes grew over time.

In Kings and Fitzwilliam class, children have been learning what can be measured in metres and centimetres. They explored the benefits of using rulers, metre sticks or other tools to measure. Can you tell which one would be the best to measure... a pair of scissors? A glue stick? The height of a door? A pen? The classroom whiteboard?

## THIS MONTH'S SUPER LEARNERS:

Fitzwilliam- Celine- She has been super keen and positive when working with measure in Maths. Keep it up, Celine!  
 Kings- Zoya- Lovely attitude towards learning. Showed a keen interest in writing and contributed well to lessons.
