

# November

# in Year 5

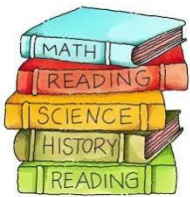

We've been working scientifically this month, to make sure that when we carry out a test it is fair. We've worked out that only changing one variable in a test will allow us to answer a scientific question, and look forward to conducting our tests using jelly!

## This Month's Super Learners

**Churchill:** Ramsay, Olivia, Aaliyah, Lena, William, Anna, Haider, Harry and Evie

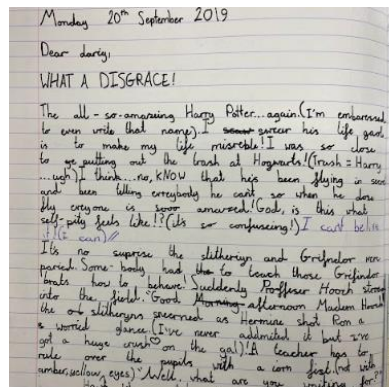

**Magdalene:** Zara, Sophie, Diana, Akira, Jisu, Myles, Stella

In English we started the month completing some fabulous, and funny diary entries – writing about the day Harry Potter had his first flying lesson. We applied our skills using parenthesis to add extra information, and show the writer's emotions (I mean they were actually the best lessons ever!).

We're now completing a persuasive writing unit – we know that we have some very convincing young writers, and are enjoying reading your work! In particular, there's been a strong argument put forward to have a class pet...

Diary entry with funny emotion in brackets

Persuasive writing with class pet

We've been keeping busy and working hard as mathematicians this month – our current unit is 'Multiplication and Division', which has put our TTRS practice and timetable knowledge to good use! We've also learnt about multiples and factors; prime numbers; square numbers and cube numbers.
