

# in Year 4

Learning about teeth and digestion has continued, with too many exciting experiments to count! From disclosing tablets and identifying plaque to hands-on experience with a box of skulls lent to the school by the Museum of Zoology.

Venturing into more creative writing, children have developed their knowledge of descriptive devices. We have seen fantastic similes, excellent personification and some brilliant use of the five senses. Children have set vivid scenes of outer space and enchanted forests, bringing their stories to life and hooking their readers in.

Later in the month, we also seized the opportunity to work outside to incorporate what we could see and hear into autumn themed poetry.

In other news, we were also fortunate enough to be invited to attend an author visit from Simon Lamb. Known most for his book, *The Passing on of Shells*, children learnt about his journey to becoming a poet.

Trinity Class have loved listening to his poems, particularly one written about a tangerine shortage!

## This Month's Super Learners

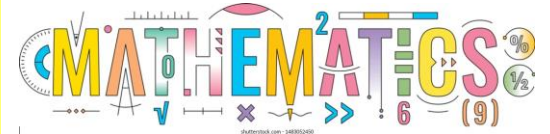

**Ariadne Aavir**

**Evie Ella**

**Rex Thomas**

**Tarik Amina**

**Georgie Payton**

Moving into our second maths unit, children have learnt a variety of ways to add and subtract four digit numbers with and without exchanges. Children in both classes have been able to explore the compact and expanded method as well as using number lines to develop problem solving skills.
