

in Year 3

WHAT IS FORCE?

In Science we explored Forces. We learned about different kinds of forces, including magnetism. We discovered that like poles repel and unlike poles attract.

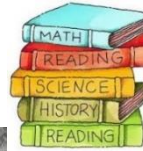

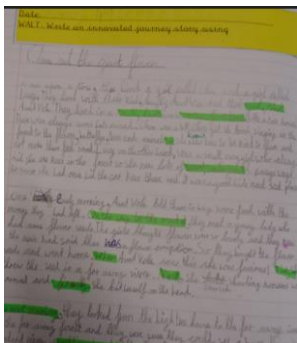

In History, we did some cross-curriculum work with Art and the product was outstanding! Pupils took on board the learning and shared with the class rich pieces of work linked to the Stone Age to Iron Age era. Pupils recreated cave paintings, houses and tools from ancient Britain.

This Month's Super Learners

**Athina, Sofia, Mila,
Jaden, Amaria, Natalia,
Amaya, Aruna**

In English we delved into the story of 'James and the Giant Peach', innovating its characters and setting and organising it into paragraphs. Some key language and grammar features included similes, alliteration, fronted adverbials of time and conjunctions. Children wrote interesting stories inspired by Roald Dahl, using a series of peculiar and magical happenings.

In Maths, we continued working on place value through addition and subtraction. Pupils worked hard at adding numbers mentally. They then moved onto adding and subtracting three-digit numbers and ones, three-digit number and tens, and three-digit number and hundreds, including adding on a number line. We also began to use formal written methods for column addition and subtraction.

In Religion Studies, we explored the traditions of Judaism. Children explored the importance of the Ten Commandments and the Torah. They also recreated and decorated Jewish symbols, such as the Hamsa Hand. In addition to this, they explored some key associated beliefs such as protection against the evil eye and negative energies. Some beautiful, colorful drawings were produced to represent this.
